APOSTILE

Aesthetic and Medical Equipment Manufacturer

About Us--Shanghai Omni Laser Skinology Co., Ltd.

Established in 2012, Omni Laser is a professional manufacturer engaged in the research and development, sale and service of 808nm diode laser, painless IPL & NIR System, PDT therapy System, ND:YAG laser System, Muscle Cyclone System, EMface System, Body Contouring System, Lose Weight System, Hydro-facial cleaning System, EMT slimming, RF devices and ect. Our own factory is located in Shanghai, conveniently located with easy access to transportation. Dedicated to strict qauality control and thoughtful customer service. Our experienced staff members are always available to discuss your requirements & ensure full customer satisfaction with experience more than 60 OEM cases, 20 ODM cases with the agents or distributors from North & South America, Europe, Australia and Asia. In addition, we have obtained MDSAP medical system, ISO13485 quality system , GMP System, FDA 510K, ANVISA, INVIMA, HC, CE and PSE certificates. Welcome to contact us!

OEM/ODM Services

Our R&D team provides customized laser solutions in design, specifications, software, and treatment programs to meet diverse client needs.

Expert R&D Team

With 15-20 years of combined experience, our engineers deliver safe, innovative designs. We handle 50+ OEM/ODM projects yearly, serving clients in 20+ countries, including the USA, Japan, and Germany.

Global Presence

We showcase at top international exhibitions each year, providing lifelong service with every purchase to bring beauty, health, and vitality worldwide.

Cold Plasma System

RD-CP100

How it works?

The Cold Plasma System uses advanced cold and hot plasma technology to ionize gases such as air or argon, so that atoms or molecules in the gas lose or acquire electrons and convert them into charged particles, thus successfully generating highly active plasma. These plasmas carry rich energy and active ingredients that act on the skin to achieve these excellent skin care benefits without causing any damage.

Application

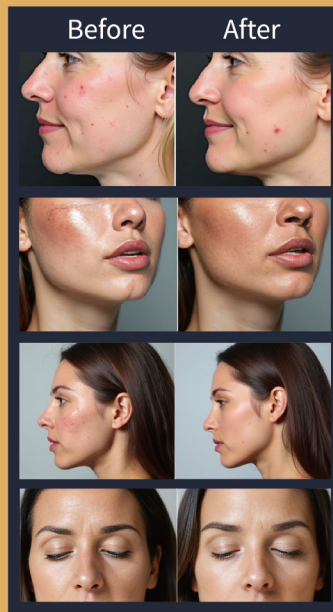

For Face

- ◆ Acne comedonica
- ◆ Anti-aging
- ◆ Regeneration
- ◆ Acne scars

For Body

- ◆ Eczemas
- ◆ Hypertrophic scars/keloids
- ◆ Skin tightening body
- ◆ Contusion
- ◆ Chronic leg ulcer/ulcus cruris
- ◆ Sonophoresis body
- ◆ Skin rejuvenation
- ◆ Sonophoresis face
- ◆ Stretch mark
- ◆ Hair regeneration

Models&Accessories

Anti-aging Series

The Initial Developer in China

3D Cyclone Wave Lifting Anti-aging Device

How It Works

3D Cyclone Wave Lifting Device is to utilize different high frequency waves on each two poles to generate low, middle and middle-high frequency 3D Cyclone Wave to stimulate all layers from epidermal, DEJ layer, dermal layer, SMAS layer and Muscle layer to do anti-aging thoroughly. At the same time, it can reduce the hair loss when we locate 3 poles on forehead and it stimulates the entire scalp. 650nm flash lasers can stimulate cell energy metabolism, promote cell repair and regeneration.

Specification:

Technology: 3D Cyclone Wave

Product No.: RD-MC100

Interfere Wave: 5Hz, 185Hz and 400Hz

Working Mode: Simple mode and Expert Mode

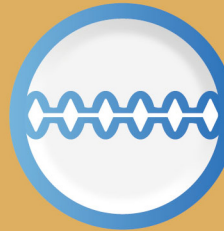

Handpiece: Two probes

Language: English and Chinese

Display: 15" TFT touch screen.

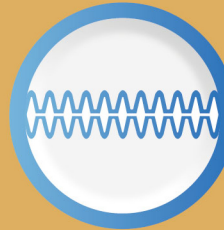

I

**Wave 1: 3D Cyclone Wave at 50Hz**

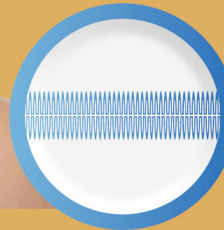

Stimulate muscles and matrix Dynamically, enhance firmness and collagen regeneration synergistically.

II

**Wave 2: 3D Cyclone Wave at 185Hz**

Target fibro-blast membrane resonance, Promote Collagen highly effective.

III

**Wave 3: 3D Cyclone Wave at 400Hz**

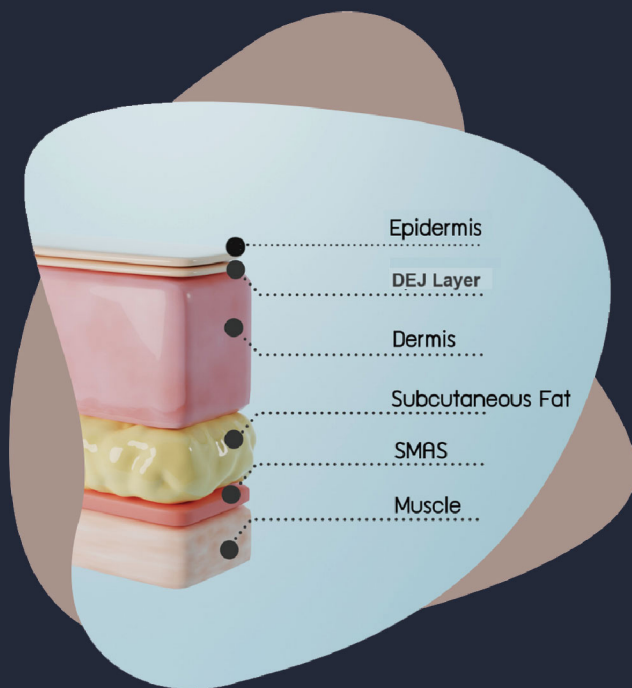

Strengthen the DEJ layer, reverse photon-aging, provides long-term support for collagen synthesis.

Advantage

- ◆ Initial developer of 3D Cyclone Wave Technology in China.
- ◆ Non-Invasive Anti-aging Technology, no heat generation, no side effects.
- ◆ 50Hz stimulates the muscle layer, 185Hz acts on the dermis, and 400Hz targets the DEJ layer, with precise layered intervention and full-layer coverage.
- ◆ The three-dimensional rotating electric field technology makes the current path spiral, covering target areas 2-3 times compared with EMS technology or RF technology.
- ◆ The rotating electric field can reduce the current dead angle, ensure that the treatment area is evenly stressed, and improve the treatment effect.

Application

- ◆ Anti-aging on face: Facial static lines, sagging contours, fine lines around the eyes
- ◆ Anti-aging on body: Improve to repair of loose abdominal skin and stretch marks
- ◆ Pain Management: Pain problems such as shoulder and neck myofascial pain, knee osteoarthritis, muscle strain after exercise, etc.
- ◆ Shorten postoperative recovery and sports injury recovery.
- ◆ Hair Loss improvement.
- ◆ Accelerate Skin Absorption.

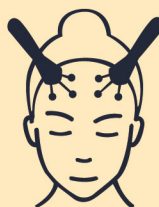

Eyes

There are many pressure points around the eyes. The 3-pronged stick gently touches and stimulates the area without rubbing or pulling, moving the muscles from the inside and giving the area firmness.

Face line

By thoroughly stimulating hard-to-reach muscles from the inside, you can slim down your face line and restore your natural beauty. The three-pronged stick moves the muscles without putting strain on the epidermis, lifting the skin without causing sagging.

Forehead and scalp

To reduce hair loss, it is important to grow healthy hair that is firm and resilient. Compared to a manual scalp massage, the 3-pole stick efficiently treats the muscles of the entire scalp. Stimulating the muscles from the forehead to the top of the head, which are usually difficult to move, also leads to a relaxing effect.

Anti-aging Series

Specification

Technology: 3D Cyclone Wave

Product No.: RD-MC101

Interfere Wave: 5Hz, 185Hz and 400Hz

Working Mode: Simple mode and Expert Mode

Handpiece: Two probes

Language: English and Chinese

Display: 10" TFT touch screen.

RD-MC101

Anti-aging Series

EMface System

EMFace Anti-Aging System

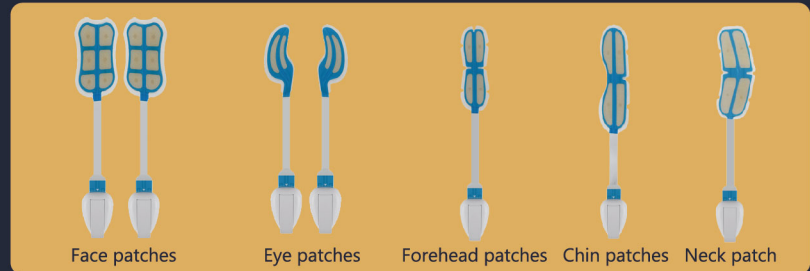

How It Work

Ems face Machine is a revolution in facial treatments. Synchronized heat energy output and strong pulsed magnetic technology to stimulate facial muscles and tighten the skin. The end result is less wrinkles and more lift naturally without needles. Finally, V-line Face treats full face in only 20-minutes. Peface machine produces muscle contraction. Electrical stimulation targets the depolarization of motor nerves, which causes associated muscles to contract. In peface machine face treatment, the pulse patterns of muscle contraction alternate between forehead or cheek muscle engagement, or both. For the forehead, the frontalis muscle is targeted. For the cheek, three muscles, the zygomaticus major, zygomaticus minor, and risorius muscles are targeted.

A single ems face treatment produces approximately 75,000 electrical pulses that trigger muscle contractions. This is accomplished over about 20 minutes.

RD-EMF600

Application

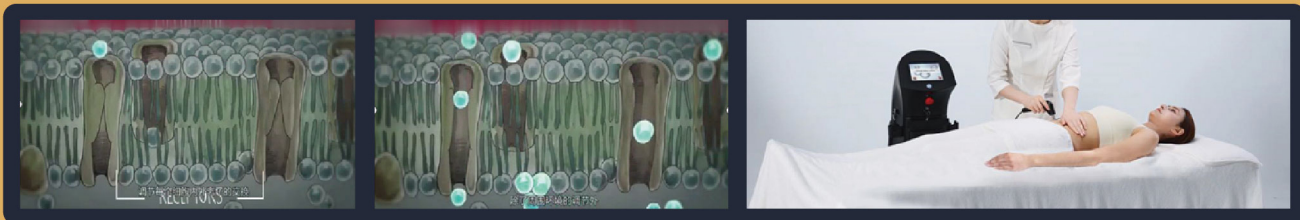

- 37% reduction of facial wrinkles in treated areas
- 30% increase in muscle tone
- 19% increase in muscle density
- 23% improvement in the lift of the face
- 26% increase in collagen
- A two-fold increase in elastin production

Body Healthy Equipment

How It works?

RD-CET device stimulates healthy cell function and revitalization through radio frequency therapy. It works at a specific frequency of 448kHz, CET body health system based on the medical studies described the Proionic System that stimulates intra and extra cellular ion exchange restoring physiological cell electrical activity, which enables the correct functionality of the cells, which causes thermal and sub-thermal effects, achieving noticeable results from the first session.

Application

- ◆ Face&body rejuvenation
- ◆ Body shaping&slimming
- ◆ Anti-hair loss
- ◆ Fade gestation wrinkles and scars
- ◆ Reduce visceral fat
- ◆ Skin tightening&reduced orange peel tissue
- ◆ Joint rehabilitation
- ◆ Improve dysmenorrhea&uterine cold
- ◆ Boost immunity
- ◆ Eliminate inflammation and prevent disease

Lose Weight and Body Sculpting Series

Cryo Fat Freeze System

How it works

Ice lipolysis is the use of triglycerides in the fat to convert into solid at a low temperature of 5 °C, through the non-invasive freezing capacity extraction device to control the freezing energy to transport to the part, targeted elimination of fat cells in the part, after the cold reaches a specific temperature triglycerides into a solid state, crystallization and aging after the metabolism to the outside of the body, so as to achieve the effect of body shaping.

The 650nm laser slimming uses a low-intensity laser to act on the subcutaneous fat layer. The laser penetrates the skin at a specific wavelength (650nm) and acts on the fat cells, causing the fat cells to release glycerol, free fatty acids and water into the lymphatic system, and then be metabolized and excreted from the body, so as to achieve the effect of weight loss.

Application

- ◆ Multi-channel refrigeration, saving treatment time
- ◆ 360° refrigeration, all-round efficient slimming
- ◆ Efficient and non-invasive slimming, non-invasive fat reduction
- ◆ Promote adipocyte apoptosis: do not damage the surrounding tissues
- ◆ Shape the ideal curve: Precise target area.
- ◆ No downtime: no recovery is required.
- ◆ Safe and comfortable experience: The freezing process is gentle and comfortable.
- ◆ Safe skin-friendly material, no damage to the skin

Lose Weight and Body Sculpting Series

Body Roller Contouring System

How it works?

The Negative Pressure Roller combined with Internal Grease Roller weight loss equipment is an innovative approach designed to enhance body contouring and promote weight loss. This technology utilizes a unique combination of negative pressure and mechanical rolling to target fat deposits and improve overall skin appearance.

Application

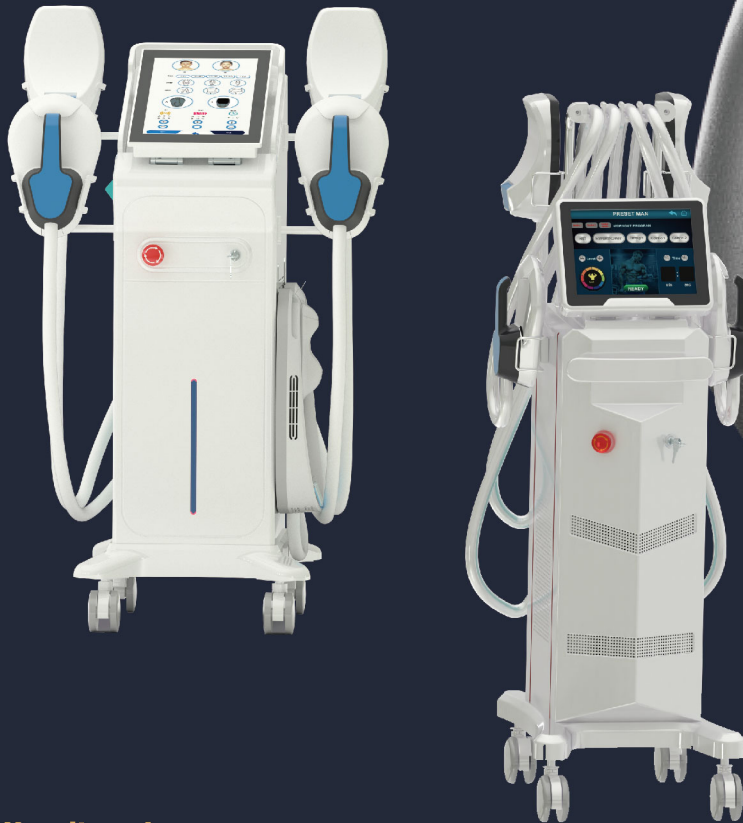

- ◆ Body Contouring and Sculpting
- ◆ Cellulite Reduction
- ◆ Skin Tightening and Firming
- ◆ Non-Invasive Weight Loss Support
- ◆ Pain Relief and Muscle Relaxation

Accessories

Lose Weight and Body Sculpting Series

EMT Muscle Sculpt System

How it works

The combination of radio frequency and Magnetic vibration technology (HIFEM), dual energy deep into the muscle and fat layers, so that the muscle to achieve 100% extreme exercise, the 100% limit muscle contraction can trigger a lot of lipolysis, Fatty acids are broken down from triglyceride acid, and accumulated in large amounts in fat cells.

The fatty acid concentration is too high, which will cause fat cells to apoptosis and be excreted from body by normal metabolism within a few weeks. Therefore, it can strengthen and increase muscles while achieving the effect of reducing fat.

Application

Common Handles

- ◆ Improve obesity physique and improve weight loss efficiency
- ◆ Strengthens muscles: Quickly builds tight muscles
- ◆ Fat Reduction: Efficient consumption of excess fat
- ◆ Get in shape: Strengthens your core
- ◆ Non-invasive contouring: No surgery required, safe contouring
- ◆ Accelerated metabolism: Boosts metabolism and contributes to health
- ◆ Improved posture: Strengthens muscle support and improves posture

Happiness Cushion

- ◆ Improves pelvic floor muscles
- ◆ Improves prostate
- ◆ Control pelvic floor muscles
- ◆ Makes the urinary system healthy
- ◆ Lifts pelvic floor muscles and restores firmness and elasticity

Accessories & Options

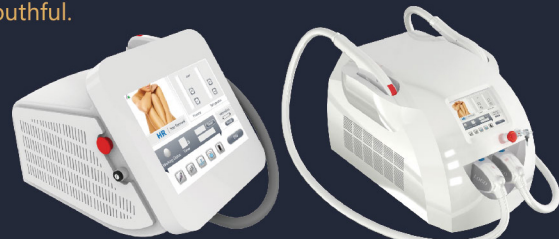

Photo Series

Painless IPL & NIR System

Initial Introducer and Developer Painless IPL System based on Square-Motion technology in China

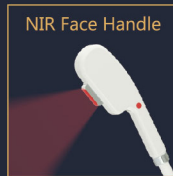

NIR Technology

The NIR module adopts 900-1800nm near-infrared spectrum (peak 1300nm) to act on the water in the middle and deep dermis. When the surface layer of water is illuminated by NIR, it increases the distance between each water molecule generates more ATP. Which can promote the repair and regeneration of cells in the body, enhance the biological activity of collagen fibers, redistribute the dermis and repair damaged skin. At the same time, The photothermal effect produced by NIR can enhance the function of blood vessels, dilate microvessels, accelerate blood circulation, improve blood oxygen content, and accelerate the elimination of metabolites, stimulate the formation of new collagen and leaves skin looking youthful.

AFT-SHR950A

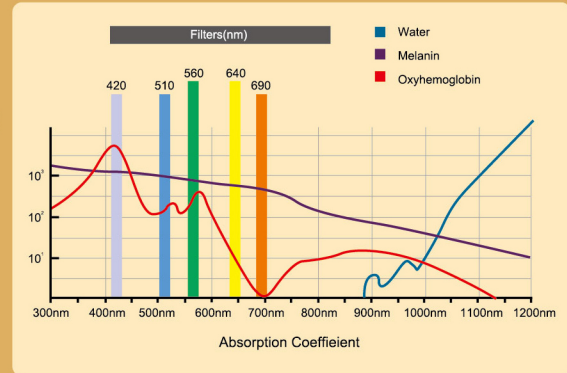

AFT-SHR950B

Painless IPL System Technology

A. Pain-Free Experience

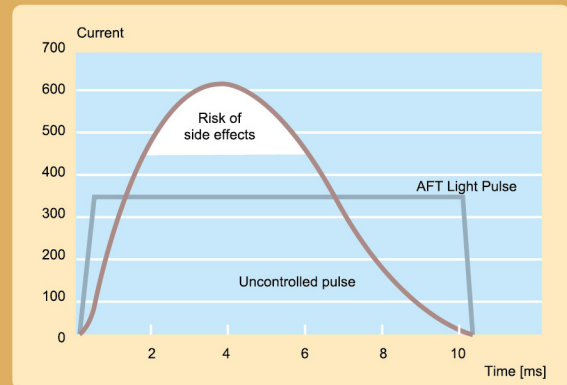

Painless IPL Series are very safe, effect and comfortable platform in aesthetic and medical field. Painless IPL is a multi-spectrum pulsed light which is a little narrower than traditional IPL. With the Wavelength 420nm-950nm give patients a comfortable experience, make them relax and easy do Acne therapy, skin rejuvenation, pigmentation, vascular therapy and hair removal. Checked the figure 1, it is easy to know that water absorption coefficient become more and more increasively from 950nm. It means the near infrared light from 950nm to 1200nm will absorb a lot of water from target place and make the treatment painful relatively. However, AFT only keep 420nm-950nm wavelength to shoot on patients, stay water on target skin and do the treatment pain-free.

B. Square-Motion Technology

AFT has applied Square Pulse Technology with stability and uniform of energy which contribute to no side effect such as pain and burn. This technology was experienced and tested well already, which is based on following operator experiences:

- i. FEE (Fluence Emitted Equally) is the first consideration, as FEE is the warranty of the safety treatment.
- ii. Motion Operation is most clients' dream, as motion operation can accelerate treatment time, which can shorten the session time and gets more benefit. However, Square pulse Technology is the Premise of Motion Operation.

Application

Skin Rejuvenation

Hair Removal

Acne Therapy

Pigmentation

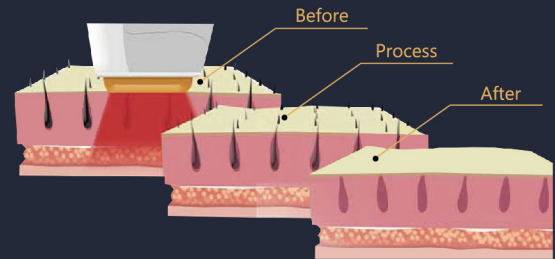

Vascular Therapy

Photo Series

Diode Laser Hair Removal System

How It Works

Diode laser hair removal uses light and heat to target hair follicles. The laser penetrates the skin to reach the hair root, converting light into heat to damage the follicle without harming surrounding tissue. This painless, simple, and safe technology is highly effective for permanent hair removal.

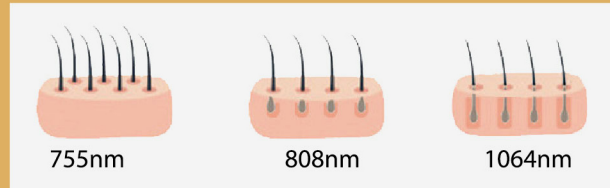

Suitable for All Skin Types

Achieve Permanent Hair Removal in 3-6 Sessions
Advanced light transmission, high laser output, and effective results.

Advantages

- ◆ Pain free Experience--All Handpiece can reach to 10J/cm² within 40ms pulse on, Pain free Expreience.
- ◆ Efficient Cooling--Imported Italy pump and Air compressor device to ensure 24 hours working.
- ◆ No shots limitation--Imported USA Laser bar, long life span.
- ◆ Supper Channel--Combines advantage of Micro-Channel and Macro-channel laser.
- ◆ Wifi function/GPS function/Customer Management System/ Renting System is available.

- 755nm for white skin (fine, golden hair removal)
- 808nm for yellow neutral skin (brown hair removal)
- 1064nm for black skin (black hair removal)

Accessories

HP1
Spot size: 10*20mm
Power: 300w/400w/500w/600w/800w
Optional nose tip: 8mm for precise small area hair removal

HP2
Spot size: 13*30mm
Power: 1000w/1200w/1600w

HP3
Spot size: 12*12mm
Power: 600w
Optional nose tip: 8mm for precise small area hair removal

HP4
Spot size: 12*24mm
Power: 1200w

HP5
Spot size: 12*36mm
Power: 1800w

Spot size: 12*12mm/12*20mm/12*36mm adjustable
Power: 1800w

Photo Series

Photo Dynamic Therapy System

OL-PDT950

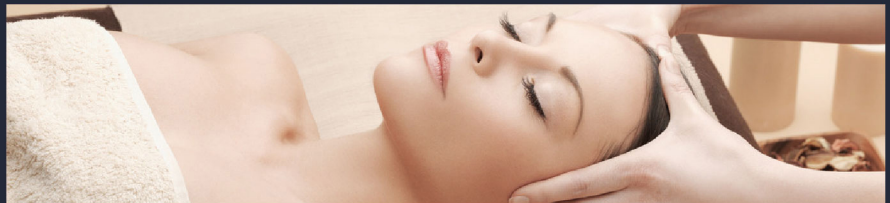

OL-PDT600

OL-PDT300

How it works

Photodynamic therapy (PDT) machines utilize a combination of light-sensitive drugs (photosensitizers) and a specific wavelength of light to treat various medical conditions, such as skin cancer, acne, acne scar, anti-aging, keratosis, rosacea, skin whitening, wrinkle improved, skin repairing, inflammation and sensitive-skin repairing, plastic surgery aftercare and so on. Wavelength is customizable.

Application

	<p>Red Light at 633nm or 660nm Reduction in Fine Lines&Wrinkles, Improved Skin Texture, Clearance of Photo Damaged Skin. SkinRepairing, Micro-circulation Improved</p>
	<p>Blue Light at 469nm or 420nm Acne, Inflammation and Redding of the Skin Therapy Comedones Improved</p>
	<p>Yellow Light at 590nm (Help the lymph system to detoxify your body)</p>
	<p>Green Light at 525nm (Reduces pigmentation through penetration into baseskin layers. Prevents the forming of fleck, gravid andaging pigment to keep skin smooth and bright)</p>
	<p>Infeard Therapy at 850nm or 830nm Osteoarthritis/ sports iniuries such as knee, ankle, shoulder, etc/ burns, scrapes, and pain relief from cuts/ ulcers/ fibromyalgia pains/ bunion pain/ tendinitis/ myofascial pain/ minimize recent nerveinjury/ woundhealing, especially in diabetics</p>

Photo Series

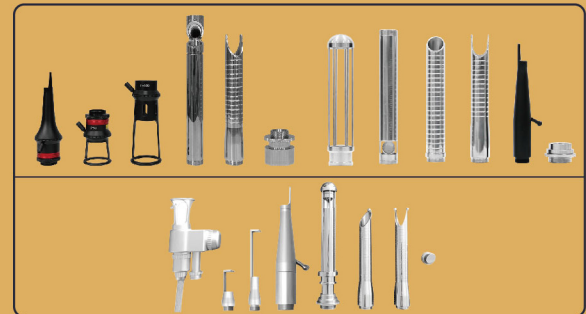

Fractional CO2 Laser System and Q-switch ND

Applications

- ◆ Acne scars, surgical scars, wound scars, burn scars.
- ◆ Eliminate Pigmentation.
- ◆ Chloasma.
- ◆ Wrinkles & Skin Laxity.
- ◆ Photo Aging Skin.
- ◆ Vagina Tightening.
- ◆ Vagina Clean.
- ◆ Vaginal Dryness Treatment.
- ◆ Vulva Resurfacing

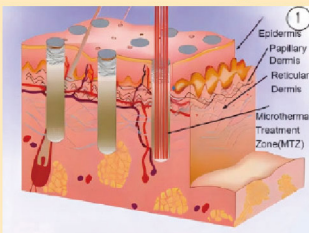

Accessories

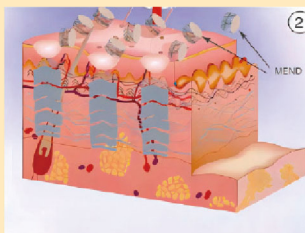

What is Fractional CO2 Laser System?

The fractional CO2 laser system fires a laser beam which is split into numbers of microscopic beams, producing tiny dots or fractional treatment zones within the selected target area only. Therefore, the heat of laser only passes deeply through the fractional damaged area. This allows the skin to heal much faster than if the whole area was treated. During the skin self-resurfacing, a great amount of collagen is produced for skin rejuvenation and eventually the skin will look much healthier and younger.

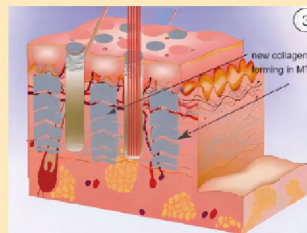

How Fractional Resurfacing works

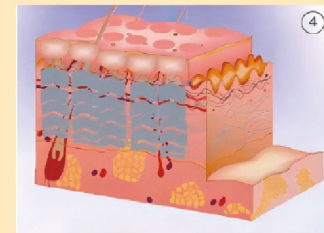

Each hit of the laser produces a Microthermal Treatment Zone smaller than a human hair, sparing the intervening normal tissue.

Collagen remodeling takes place in the MTZ, and a small plug of MicroEpidermal Necrotic Debris (MEND) flakes off in a few days.

A second treatment creates more MTZs as the collagen from the first treatment remodels and tightens.

Each treatment session covers about 20% of the skin surface. Usually 4-6 treatments 1 week intervals are needed.

Photo Series

Yag Laser+Pico Second Laser System

How it works

It uses the theory that a specific wave length (1064m or 532nm) of laser will be absorbed by specific pigment. The high energy of laser, absorbed by the specific pigment, could cause the pigment to swell and explode, partial fragments of the pigment will be shot out of the body, and the other pigment fragments will be removed by your body's immune system over a period of time. Because the normal skin absorbs little energy induced by laser at the wavelength of 1064m or 532m, so the laser could selectively target and destroy tattoo pigments but not damage the surrounding normal tissues.

Application

- ◆ Skin rejuvenation
- ◆ Skin whiteing
- ◆ Speckle removal
- ◆ Acne removal
- ◆ Pigment removal
- ◆ Removing all color tattoos
- ◆ Black doll treatment

Pico-Second Laser

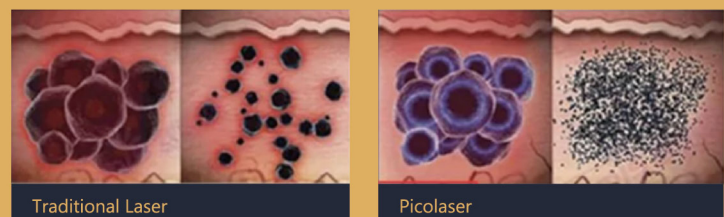

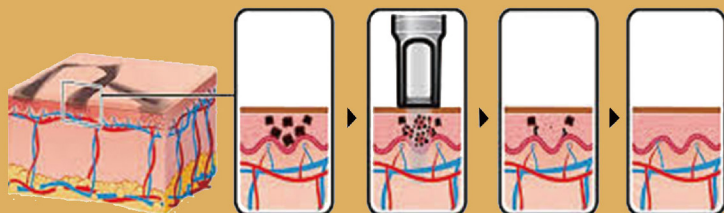

How it works

The Pico Laser is measured by Pico-seconds, the technology of Pico laser shatters pigments into much smaller fragments compared to Q-switch; this allows the body to get rid of stubborn pigmentation at a faster rate. Pico Lasers work by using laser energy that puts pressure to squeeze cells, this activates natural cells to trigger production of collagen and elastin without damaging the skin's surface.

Application

- ◆ Remove colored tattoos
- ◆ Removal birthmark
- ◆ Skin rejuvenation
- ◆ Skin whiteing
- ◆ Speckle removal
- ◆ Acne removal
- ◆ Pigment removal
- ◆ Removing all color tattoos
- ◆ Black doll treatment

Traditional Laser

Picolaser

Multi-Functional Equipment

Low Laser Therapy and Inner Roller System

How It Works

The RD-LW100 Laser irradiation forms pores in the adipocyte membrane, allowing a large amount of lipids to flow out of the pores and enter the intercellular matrix. The enlarged adipocytes in the body are transformed from large molecules to small molecules into triglycerides, which are metabolized and excreted by the human body, ultimately achieving the effect of reducing fat cell volume for weight loss, slimming.

Application

- ◆ Reshaping action: Reshapes contours and smooths out wrinkles.
- ◆ Muscle action: Tones muscles and tightens tissues.
- ◆ Sedation: Improve oxygen and eliminate pain.
- ◆ Drain action: Eliminate toxins and help lymphatic drainage.
- ◆ Vascular effect: Improve blood circulation and nourish tissues.

Inner Ball Roller Appendix

Body Roller Handle

The ball body handle combines mechanical compression micro-vibration and Red and blue light ray technology in one, the reciprocating motion of continuous push-pull kneading on the skin, the tissue will experience some pressure and lifting actions, which helps to tone and firm the skin tissue, reduce cellulite and shape.

Facial Roller Handle

The facial roller handle combines mechanical compression micro-vibration and Red and blue light technology in one, and the reciprocating motion of continuous pushing, pulling and kneading of the skin will cause the tissue to undergo some pressure and lifting actions, effectively reducing swelling, resisting, tissue sagging, and rejuvenating the face.

IECHIFU+Micro-Needle System

How It Works

RD-SR100 is a state-of-the-art multifunctional beauty and therapeutic device equipped with optional seven specialized handpieces, each designed for targeted treatments, combining innovative technologies to deliver exceptional results.

Application

- ◆ Facial rejuvenation and anti-aging
- ◆ Non-invasive fat reduction with body sculpting
- ◆ Collagen regeneration and skin firming
- ◆ Skin sedation and pore contraction
- ◆ Intimate care and firming

◆ HP1-Liposonic (Non-invasive Fat Reduction)

Liposonic handpiece uses body probes of different depths (0.6cm, 0.8cm, 1.0cm, 1.3cm, 1.6cm) to break dissolved fat cells through focused ultrasound into 65-70 degree heat energy, quickly break dissolved large fat cells, and stimulate collagen contraction and proliferation at the same time.

◆ HP5-The EMRF (RF)

The EMRF handpiece technology to promote collagen regeneration in the skin. The deep penetration of RF energy stimulates the natural production of collagen, enhancing skin elasticity and reducing wrinkles for a firmer, youthful appearance.

◆ HP2&HP3-Multi row ICE HIFU12 & Single Point ICE Vmax

These handles use advanced cooling ultrasound technology for treating signs of aging, dry skin, and skin burns. The multi-row HIFU2 provides precise, multi-layered ultrasound energy, while the single-point Vmax delivers focused, deeper penetration to stimulate skin rejuvenation. EMRF Thermage (Collagen Regeneration)

◆ HP6-Ice Hammer (Soothing & Pore Tightening)

The Ice Hammer reduces the skin surface temperature by cooling conduction, provides cooling relief to the skin, reducing the sensation of burning and soothing irritation. Additionally, it tightens enlarged pores, leaving the skin smoother and more refined after treatment.

◆ HP4-M8 Gold Microneedling (Anti-aging RF Technology)

The M8 handle is equipped with cutting-edge RF microneedling technology. Its unique "explosive mode" delivers RF energy directly to the subcutaneous tissue, penetrating up to 8mm beneath the skin surface. This enhances skin tightness and reduces the signs of aging, such as wrinkles and fine lines.

◆ HP7-Private Doll (Intimate Area Tightening)

Private Doll is a handpiece for tightening the inside of the vagina and vulva. Collagen is activated 360 degrees through heat in the vagina. Achieve vaginal tightness and increase vaginal humidity. Vulva repair is also through the radio frequency technology to speed up local blood circulation to repair vulva slack, so that it is firm.

Multi-Functional Equipment

Oxygen Bubble Facial Beauty System

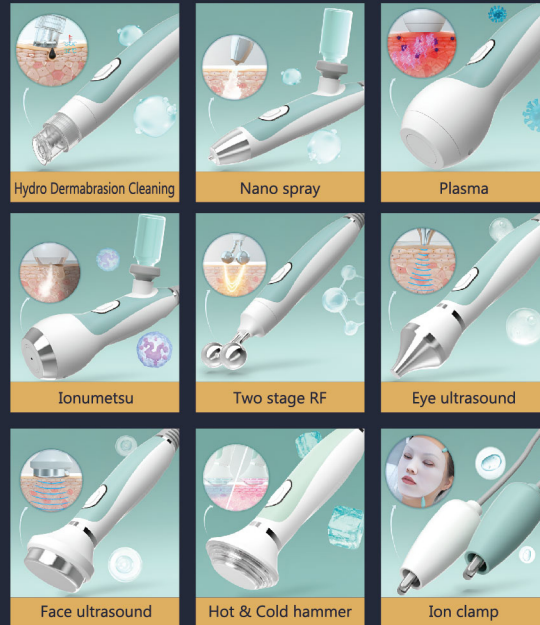

How It Works

RD-HO100 is a highly effective cleansing device designed for acne and mites and contains 9 handpiece that can be reused. Oxygen bubble technology makes the atomic group of water molecules smaller and oxygen more soluble in them, utilizing vacuum negative pressure to form a vacuum circuit, combining ultra-micro small bubbles and nutrient solution, and a spiral suction head that acts directly on the skin to promote peeling. The combination of Oxygen bubble and adsorption opens the follicle funnel area in a painless and safe manner, removes keratin metabolic waste, provides adequate nutrition, moisturizes and refines the stratum corneum, and enhances skin radiance.

RD-HO100

With 9 handpiece

Application

- ◆ Deep Cleansing
- ◆ Highly hydrating and moisturizing
- ◆ Anti-acne and anti-inflammatory
- ◆ Promotes skin absorption
- ◆ Lifting and firming
- ◆ Protect eye youth

Shanghai Omni Laser Skinology Co., Ltd

--Aesthetic and Medical Equipment Manufacturer--

Provide More Than 60 Solutions for Franchises, Salon Chains, Importers and Beauty Training Centers in More than 30 countries in the World.

Welcome to Contact with us if you need to

1. Create Your Own Brand.
2. Need the Unique Design.
3. Need the Intelligent Software.
4. Provide Management System for Franchises.
5. Need Wifi and Cloud Function.
